### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 6, 8, 10, 12, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Chien et al (US 5,891,114).

Chien discloses a catheter (Figure 8) where the braid wire cross-sectional area at the distal section is less than the proximal wire cross-sectional area. The braid wires can be continuous throughout the proximal and distal section (col. 10, lines 34-44; Figure 7, col. 13, lines 55-57, and col. 14, lines 55-56).

### ***Allowable Subject Matter***

3. Claims 7 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

4. Applicant's arguments filed October 19, 2005 have been fully considered but they are not persuasive.
5. With respect to applicant's arguments that Chien fails to disclose the claimed braid (or catheter) in which there are at least two continuous wires, each having a

Art Unit: 3763

proximal diameter or cross sectional area and a smaller distal diameter or cross sectional area, the examiner disagrees. Chien discloses, in figure 8, a braided section where the distal braid section has a cross-sectional area less than the proximal cross-sectional area. Throughout its disclosure, Chien set forth that the catheter can have braid wires continuous throughout the catheter or of two butt-welded braided sections (see rejection above). Therefore, it would have been an obvious design choice to select between either one. See *In re Larson*, 340 F.2d 965, 968. 144 USPQ 347, 349 (CCPA 1965).
